DSAMH

Description:

The Assertive Community Outreach Program(s) (ACO), or programs that are similar to Program(s) for Assertive Community Treatment (P/ACT) is a program, which will provide:

Mobil Medication; In-Home Residence Supports. The majority of services are provided at residences and other natural community settings to assist with medication management and to provide skills development services to help prevent homelessness. Key features include provision of treatment by a well-integrated, multidisciplinary team in the client's own environment as much as possible and low case loads to permit intensive and frequent services.

Service Eligibility

<u>Eligibility</u>	<u>Description</u>
MH	MENTAL HEALTH

Service Code**Population Served**

Persons to be served are adult individuals who have been or are now diagnosed with a severe and persistent mental illness (SPMI) and who's severe symptoms or impairments have not effectively been remedied by available treatments or who because of their mental illness resist or avoid involvement with traditional mental health services.

Contractor Qualifications

A state licensed community mental health center. Licensed and Qualified FTE staff who meet the requirements below.

Staff Requirements

- One full time team leader/supervisor, who is the clinical and administrative supervisor of the team and also functions as a practicing clinician on the team, The team leader must possess a master's degree and be a licensed mental health provider or be working toward licensure.
- A psychiatrist on a minimum of 16 hours per week for every 50 persons served by the team.
- A full time registered nurse, who is responsible for medication management.
- A minimum of 5 to 9 FTE mental health professionals and workers on an urban team, or a minimum of 5 to 7 FTE on a rural team pending caseload, this includes the team leader and the psychiatrist.

Staff to Client Ratios

The urban program shall serve from 5 to 10 clients per FTE clinical staff persons, pending on acuity. The rural program shall serve from 5 to 7 clients per FTE clinical staff persons, pending on acuity.

Staff Training

The Contractor shall provide orientation and training for all staff members regarding the PACT model, administrative procedures, persons served by the PACT team rights, confidentiality of treatment records and other relevant policies, procedures and clinical protocol of the Utah Department of Human Services, Utah Division of Substance Abuse and Mental Health. The Contractor shall participate in all PACT consultation and training provided by the DHS/DSAMH.

Tx/Serv Requirement

The ACO Program or programs that are similar to PACT shall evaluate each client's needs, strengths, and preferences and develop an individualized treatment plan, which should identify individual needs and problems and specific measurable long- and short-term goals along with the specific services and activities necessary for the client to meet those goals and

improve his or her capacity to function in the community. The treatment plan shall be developed in collaboration with the client

Name: or guardian, if any and when feasible, the client's family. The client's participation in the development of the treatment plan shall be documented.

The PACT team staff shall meet daily at regularly scheduled times for treatment planning meetings. At each treatment planning meeting all program staff should attend.

Individual treatment team members are responsible to ensure the clients actively involved in the development of treatment and service goals. With the permission of the client, staff shall also involve pertinent agencies and member so the client's social network in the formulation of treatment plans.

Each client's treatment plan shall identify needs and problems, strengths and weaknesses, goals and specific, measurable treatment objectives. The treatment plan must clearly specify the services and activities necessary to meet the client's needs and who will be providing those service and activities.

The following key areas should be addressed in the treatment plan:

- Symptom stability management;
- Education;
- Housing;
- ADL;
- Employment;
- Daily structure;
- Family and Social Relationships.

Treatment or Service Requirements: Operating as a continuous treatment service, the ACO Program or similar program as PACT shall have the capability to provide comprehensive treatment, rehabilitation and support services as a self contained service unit.

Services shall minimally include the following:

- Case Management: Each client will be assigned a primary case manager who coordinates and monitors the activities of the individual.
- Crisis Assessment and Intervention: Crisis assessment and intervention shall be provided 24 hours per day, seven days per week. These services will include telephone and face-to-face contact and will be provided in conjunction with the mental health center and emergency services as appropriate.
- Symptom Assessment, Management, and Individual Supportive Therapy: Symptom assessment, management, and individual supportive therapy help clients cope with and gain mastery over symptoms and impairments in the context of adult role functioning. This therapy shall include treatment planning and the therapist responsibility to write their treatment plan including but not limited to the following:
 - Medication Prescription, Administration, Monitoring and Documentation
 - Substance Abuse Services
 - Work-Related Services to help clients find and maintain employment in community based job sites. This will include but not necessarily be limited to:
 - Assessment of job-related interests and abilities, through a complete education and work history assessment as well as on the job assessments in community based jobs.
 - Assessment of the effect of the client's mental illness on employment, with identification of specific behaviors that interfere with the clients work performance.
 - Development of interventions to reduce or eliminate those behaviors.
 - Development of an ongoing employment rehabilitation plan to help each client establish the skills necessary to find and maintain a job.
 - Individual supportive therapy to assist the client to identify and cope with the symptoms that may interfere with their work performance.
 - Work related supportive service, such as assistance with grooming and personal hygiene, securing of appropriate clothes wake-up calls and transportation.
 - Activities of Daily Living: Services to support activities of daily living in community based settings include individualized assessment, problem, solving, side by side assistance and support, skill training, ongoing supervision and environmental adaptation to assist client to gain needed skills to:
 - a. Carry out personal hygiene and grooming tasks.
 - b. Perform household activities, including house cleaning, cooking, grocery shopping, and laundry.
 - c. Find housing, which is safe and affordable (as defined by Housing and Urban Development (HUD)).
 - d. Develop and improve money management skills.
 - Use available transportation services.
 - Effectively use personal physician and medical services.
 - Develop appropriate social interpersonal relationship, and leisure time skills to support social, interpersonal relationship, and leisure-time.
- Support Services: Support services or direct assistance to ensure that clients obtain the basic necessities of daily life to include but are not limited to Medical services.
 - Safe, clean and affordable housing as defined by HUD.
 - Financial Support
 - Social Services

Record Keeping

The ACO Program or similar program to PACT shall maintain written policies and procedures for all services as follows:

For each client, a treatment record that is confidential, complete, accurate and contains up-to-date information relevant to the

client care and treatment.

- The record shall sufficiently document assessments, treatment plans, and the nature and extent of services provided.
- The treatment records are located at the team headquarters in a locked file.

- For the purpose of confidentiality, disclosures of treatment records are subject to the provisions of applicable state and federal laws.
- Each client's record shall be available for review by the client and the guardian if any upon request, subject to the provision of

DSAMH

Description:

Wraparound: The DSAMH highly recommends using the wraparound model in improving the quality of life for children/youths with SED and their families. Wraparound is a philosophy of care that emphasizes a planning process involving the child and family and relies on individually designed collaborative community services and natural supports for that child and family to achieve positive outcomes. Furthermore, the model operates on a value system that is child centered, family focused, culturally competent, strength based, outcome driven, and community based. To successfully implement the wraparound model, a community collaborative structure has to be in place for the planning and delivery of integrated services. Existing resources need to be maximized and savings will be realized through increased efficiency and effectiveness of system operation.

Month	\$300,000.00

Service Eligibility

<u>Eligibility</u>	<u>Description</u>
MH	MENTAL HEALTH

Service Code**Population Served**

Target Population: The target populations of this program are children/youth with SED, who are 0-17 years of age, or up to 21 years of age if currently receiving services through an Individualized Educational Plan (IEP) as a student in a school district under the Individuals with Disabilities Education Act (IDEA). Family members of these children and youth are also eligible for

Contractor Qualifications

A state licensed community mental health center. Licensed and Qualified FTE staff who meet the requirements below.

Staff Requirements

Provider's Qualifications: The Contractor must comply with all state and federal regulatory provisions required to provide children/youth and family mental health services. The Contractor shall assure and document that all staff persons possess adequate training to perform the duties for which they are assigned and meet all applicable requirements for state certification and/or licensing.

Staff to Client Ratios

- i. Staffing pattern is appropriate for program service design and implementation.
- ii. Qualification of key personnel is adequate.
- iii. Staffing pattern is appropriate to addresses cultural, language and disability issues.
- iv. Timelines are developed to demonstrate the sequential of key wraparound activities.
- v. Implementation benefits administrative and support staff, clinicians, families and key stakeholders.
- vi. Clinical supervision is adequate to ensure quality services and fidelity to wraparound model.

Staff Training

The Contractor shall provide orientation and training for all staff members regarding the service wraparound model, administrative procedures, person's rights that are served by the team, confidentiality of treatment records and other relevant policies, procedures and clinical protocol of the Utah Department of Human Services, Utah Division of Substance Abuse and Mental Health. The Contractor shall participate in all children/youth wraparound preferred practice consultation and training provided by the DHS/DSAMH.

Tx/Serv Requirement

Program Treatment Services and Assessment:

Program treatment services must include the following components:

i. Assessment and diagnosis, including substance use

Name: ii. Treatment plan development

iii. Risk Assessment and Crisis and/or Safety plan development,

iv. Psychiatric services

v. Crisis assessment and intervention

vi. Individual, group and family therapy

vii. Family support services

viii. Collaborative Consultation

ix. Case Management

x. Skills Development (for example, anger management and leisure time utilization).

xi. Support Services (for example, school based services, in-home services, respite, and mentoring).

xii. Education, support and consultation to families and significant others.

xiii. Other services in keeping with Utah Medicaid definitions including those designated as Creative Interventions.

xiv. Intensive interventions such as day treatment, residential and in patient care are available.

xv. The Contractor must address issues of culture, language, age, gender, and disabilities.

xvi. Issues of co-occurring disorder(s) must be addressed.

xvii. Program services are available to children/youth and family in their own community.

Cross Agency and Consumer Collaboration:

i. Mechanism to develop and maintain high level of cross agency collaboration.

ii. Families are meaningfully involved in all phases of treatment planning, delivery, and evaluation.

iii. There is development of a collaborative working relationship with other providers such as family advocates, community groups, substance abuse, juvenile justice, education, child welfare, and health.

Record Keeping

Special Record-Keeping Requirements: The program shall maintain written policies and procedures to ensure program staff follows standards in record keeping:

i. Each child/youth shall have a treatment record that is confidential, complete, accurate, and contains up-to-date information relevant to the assessment, diagnosis, treatment plan, service delivery, and evaluation.

ii. Each record shall be contained in a locked file in keeping with the confidentiality requirements of the Community Mental Health Center (CMHC).

iii. For purposes of confidentiality, disclosure of treatment records is subject to all of the provisions of applicable state and federal laws.

iv. The record of each child/youth shall be available for review by the parent/guardian upon request and is subject to all provisions of applicable state and federal laws.

Creation Date: 1/25/2001

Obsolete Date:

Agencies Using Code

DMH

DSAMH

Description:

To provide Mental Health Services for clients under 18 years of age. Funds allocated by the State Legislature to counties for Mental Health Services. This is a part of the Division of Child and Family Services Lawsuit agreement. These funds are to provide input (evaluation and review within 24 hours of request) to the child welfare service plan for those families the community Mental Health Centers have treated within the past year.

Service Mental Health Residential (IMD Diversion)

Contract Type: Either a non-fixed or fixed amount contract required

Residential: No

Creation Date: 1/25/2001

Obsolete Date:

Agencies Using Code

DMH
DSAMH

Description:

The purpose of this code is to reduce the number of mentally ill individuals in a nursing home below the allowable Federal level of 50%. If more than 50% of the patients in a nursing home are classified as mentally ill, the nursing home is designated under federal regulations as an Institution for the Mentally Diseased (IMD) and patients between 22 and 65 are then technically not eligible for Title XIX funding. The State was at risk of losing Title XIX funding, so this service was developed.

(PASSR)**

Creation Date: 8/15/2002

Obsolete Date:

Contract Type: Open or non-fixed dollar amount contract required

Residential: No

Agencies Using Code

DMH

DSAMH

Description:

Pubilc Law 100-203 mandates States to conduct an evaluation for all persons who are making application or residing in Medical Certified Nursing Facilities who are suspected or diagnosed as having a Serious Mental Illness. The State must contract for the PASRR evaluations, which are then used by the State Mental Health Authority (DMH) to determine appropriate service needs of this population. This program was initially set-up in the FINET system. It has been determined, while starting a new contract year, it would be more appropriate to have the billing and reimbursement of the contracts in the USSDS system.
